

DRAWINGS

The Examiner has objected to the drawings under 37 CFR 1.83(a). The Examiner contends that the drawings must show every feature of the invention specified in the claims and, therefore, the heat pipe panel must be shown or the feature(s) canceled from the claim(s) and no new matter should be entered.

The Examiner requires that a proposed drawing correction or corrected drawings in reply to this Office Action are necessary to avoid abandonment of the application and that this objection will not be held in abeyance.

Applicant respectfully submits that the following amendment previously made in the specification (paper no. 3 filed April 1, 2002) will suffice to satisfy the Examiner's objection in lieu of a drawing correction:

The paragraph starting at page 2, line 35 has previously been amended at page 3, line 4 by inserting reference numerals 12 and 13 after "panels" and before ",". Applicant respectfully submits that radiator panels 12 and 13 are designated in said paragraph as heat pipe panels (12, 13), therefore, obviating any necessity to amend the drawings.

Applicant respectfully requests that in view of this amendment that the Examiner withdraw this objection.
